EDUCATION

B.S. in Cybersecurity, University of South Florida

May 2026

Relevant Coursework: Network Security & Firewalls, Penetration Testing, Computer Security Policies, Information Security & IT Risk Management

CERTIFICATIONS

• CompTIA Security+ • CompTIA Network+ • CompTIA CySA+ • AWS Certified Cloud Practitioner (In Progress)

EXPERIENCE

IT Technician

May 2025 - May 2026

University of South Florida

Tampa, FL

- Triaged 100+ weekly help desk tickets in Jira, supporting 50,000+ staff and students across 520+ classrooms.
- Led a team of 35+ student technicians, optimizing task routing and on-call coverage for incident resolution.
- Diagnosed hardware, network, and Microsoft 365 incidents remotely across classroom technology systems.

Cybersecurity Apprenticeship

February 2026 - March 2026

ReliaQuest

Tampa, FL

- Conducted SOC alert triage and threat investigation on simulated incidents in the GreyMatter XDR platform.
- Analyzed Windows event logs, firewall traffic, and endpoint telemetry to identify IOCs and validate threats.
- Authored detailed remediation reports documenting attacker TTPs, impacted assets, and containment steps.

Student Technician

May 2024 - May 2025

University of South Florida

Tampa, FL

- Performed weekly assessments of 40+ classrooms, checking network connectivity and endpoint functionality.
- Provided technical troubleshooting for classroom technology issues within a 4-minute SLA response time.
- Escalated complex incidents to senior IT staff via Microsoft Teams for rapid incident resolution and review.

PROJECTS

SIEM & SOC Home Lab (<https://shivenhomelab.vercel.app/>)

February 2026 - Present

- Architected a segmented multi-VM SOC lab in VirtualBox with Active Directory, Windows 10, Kali, and pfSense.
- Deployed Splunk Enterprise as the SIEM and ingested Windows Security logs, Sysmon and pfSense alerts.
- Engineered MITRE ATT&CK-aligned correlation searches detecting brute force and lateral movement.
- Conducted authenticated Nessus scans across lab assets, prioritizing remediation by CVSS and NIST 800-53.

Agentic AI SOC Triage Assistant (<https://soc-ai.up.railway.app/>)

March 2026 - May 2026

- Engineered an autonomous LLM agent with LangGraph and GPT-4 to triage and investigate SOC alerts.
- Built an enrichment pipeline that correlates alert data with live VirusTotal and AbuseIPDB threat intelligence.
- Mapped findings to MITRE ATT&CK and generated incident reports with verdicts and recommended actions.

TECHNICAL SKILLS

Security Tools

Splunk, Wazuh, Wireshark, Nmap, Nessus, Burp Suite

Frameworks

NIST 800-53, NIST 800-61, MITRE ATT&CK, ISO 27001, RMF

Programming

Python, Bash, PowerShell, SQL, C/C++, JavaScript

Systems & Cloud

Windows, Linux, Kali Linux, macOS, AWS, Azure, VMware
